WORK EXPERIENCE

Red.Digital Ltd. (A Robi Axiata Company), Dhaka Software Engineer (Android)

04/2023 - Present

- Modernizing the **Robi-SFA** app UI using **Kotlin** and **Jetpack Compose** to deliver a seamless, location-aware field force experience. Leveraged **Clean Architecture** to build a highly modular, decoupled, and testable enterprise codebase.
- Revamped the **BDTICKETS** app's UI using **Flutter**, leveraging **BLoC** and **Clean Architecture**—structured across **Presentation**, **Domain**, and **Data** layers—to deliver a more seamless, scalable, and consistent user experience.
- Revamped the UI of **Binge**, a large **Kotlin** native Android app, using **Jetpack Compose** and **XML**. Collaborated with teams, thoroughly tested features, and supported a successful release.
- Maintained and enhanced major native **Kotlin** apps (**Binge** ecosystem, **My Robi**, **My Airtel**), implementing features, fixing critical bugs, and optimizing performance. Developed a lightweight **Binge SDK** integrated into **My Robi** and **My Airtel** apps to streamline and improve the video playback experience.

- App Link:** <https://play.google.com/store/apps/details?id=com.bluetech.bdtickets.launcher&hl=en>

BizMotion Limited, Dhaka Junior Software Engineer (Android)

2022 - 2023

- Developed new features and UI for the **Akash DTH** native **Java** android app, collaborating with cross-functional teams to ensure robustness through edge-case testing and usability audits.
- Implement requested features, fix bugs, and performance improvement on running large **Java** native android applications (i.e. **FMCG** and **Pharma**)
- App Link:** <https://play.google.com/store/apps/details?id=com.bizmotion.akash.v3>

PERSONAL PROJECTS

- Smart Ummah
 - Smart Ummah** is an **Android** Islamic **utility** app built with **Compose Multiplatform**, featuring AI voice-powered search, accurate prayer time calculations, an interactive Qibla compass, a digital Tasbeeh counter, and comprehensive access to the Quran, Duas, and Asmaul Husna.
 - App Link:** <https://play.google.com/store/apps/details?id=com.jaxenlabs.smartummah>
- Baby Shop
 - Built and deployed a production-ready kids fashion **e-commerce** application utilizing **Flutter**, **GetX**, and **Supabase**.
 - App Link:** <https://play.google.com/store/apps/details?id=com.babyshopltd.app>

EDUCATION

B.Sc in Computer Science and Engineering Ahsanullah University of Science and Technology

2017 - 2022

CGPA: 3.32/4.00

SKILLS

Jetpack Compose Flutter (Bloc, GetX, Provider)

Android Development SDK Development

Android Architecture Patterns Material Design

SQL Reactive Programming

Jetpack Architecture Components Git and GitFlow

Docker Unit Testing Coroutines and Flow

Media Player API Development and Integration

Dagger2 Hilt MVVM

Data Structures and Algorithms Spring Boot

ACTIVITIES & ACHIEVEMENTS

- Solved 503+ problems and participated in multiple online programming contests across renowned online judges.
[GeeksForGeeks](#) [CodeChef](#) [Toph](#) [LeetCode](#) [HackerRank](#)
- Outstanding Support Award (Robi Q1-2025)
[Awarded for implementing the new UI/UX revamp of the Binge Native Mobile app and Binge Native TV app.](#)
- Outstanding Delivery Award (Robi Q2-2024)
[Awarded for contributing to the full UI/UX revamp of the Binge Native Android app.](#)

PROGRAMMING LANGUAGES, FRAMEWORKS & TOOLS

Intermediate:

Java, Kotlin, C++

Comfortable:

Dart, Golang, Python

Familiar:

PHP, C#, JavaScript, PL/SQL

Databases:

Room, SQLite, MS-SQL, Oracle, Firebase, MySQL, MongoDB, PostgreSQL, Redis, Supabase

Frameworks:

Native Android, Jetpack Compose, Flutter, Spring Boot, Golang, Swing

Tools:

Docker, Microsoft Visual Studio, NetBeans, Visual Studio Code, Android Studio, IntelliJ Idea, Google Colab
